187 GPX 5.5 NECK BRACE

When needed, the KTM Neck Brace can safely arrest dangerous movements of the head in both race and road use. The forces arising are transferred effectively from the neck to the upper body. The neck brace offers scientifically and technologically advanced protection against:

- » Hyperflexion (extreme forward movement of the head)
- » Hyperextension (extreme backward movement and overstretching of the head)
- » Lateral hyperflexion (extreme movement of the head to the side)
- » Axial loading (compression of the spinal column due to a corresponding load on the helmet)
- » Posterial hypertranslation (rearwards shunting of the head into the neck)
- » Uncontrolled movements of the head/helmet in the event of a crash
- » Energy-absorbing material on the outer surface and body contact surface
- » CoreFlex in the thoracic spinal area with predefined breaking point for heavy impact situations
- » Variable size adjustment
- » Simple handling with quick-release fasteners
- » Unique height adjustment system on the back for different helmet spacings or sitting positions
- » Including revamped, optional strap
- » Detachable clip-on pads for simple cleaning and maintenance
- » Made exclusively for KTM by Leatt®

238 STX NECK BRACE

When needed, the KTM Neck Brace can safely arrest dangerous movements of the head in both race and road use. The forces arising are transferred effectively from the neck to the upper body. The neck brace offers scientifically and technologically advanced protection against:

- » Hyperflexion (extreme forward movement of the head)
- » Hyperextension (extreme backward movement and overstretching of the head)
- » Lateral hyperflexion (extreme movement of the head to the side)
- » Axial loading (compression of the spinal column due to a corresponding load on the helmet)
- » Posterial hypertranslation (rearwards shunting of the head into the neck)
- » Uncontrolled movements of the head /helmet in the event of a crash
- » Energy-absorbing material on the outer surface and body contact surface
- » CoreFlex in the thoracic spinal area with predefined breaking point for heavy impact situations
- » Variable size adjustment
- » Simple handling with quick-release fasteners
- » Unique height adjustment system on the back for different helmet spacings or sitting positions
- » Including revamped, optional strap
- » Detachable clip-on pads for simple cleaning and maintenance
- » Made exclusively for KTM by Leatt®
- » 82 % nylon / 15 % EVA / 3 % Synthetic leather

QUALITY IS OUR CLAIM

WHY IT’S CALED “KTM” POWERWEAR:

If you ride a KTM, you know why: Because a KTM is a special motorcycle.
With unrivalled ride dynamics, outstanding workmanship, and well-designed and tried-and-tested solutions down to the smallest detail. Developed, built and tested by real bike riders.
READY TO RACE! With precisely this aspiration, we also develop and produce the KTM PowerWear collection. Not any old “cheap promotional articles” that we simply print our logo on, but stylish sportswear of outstanding quality and rider equipment developed and tested seriously by professionals – READY TO RACE!

RESPONSIBILITY:

Quality also has to do with responsibility and sustainability: Consequently, for example, we only use raw yarn, fabrics and colourings certified according to the OEKOTEX 100 standard in the sportswear textiles (including T-shirts, sweatshirts, baby clothing) produced in Europe. The cotton fabrics used have very long fibres and are extremely shape-retentive, while elaborate, reactive colouring processes ensure a maximum length of colour fastness. We import particularly high quality and durable nylon yarns (produced mainly in the Far East) for the important materials used in motorcycle clothing. We test all textiles regularly for prohibited substances, such as AZO dyes and allergenic constituents. Just as regularly, we check that exclusive use is made throughout the world of certified production sites without child labour or illegal workers.

SIMPLY ASK THE PROFESSIONALS:

One significant benefit when KTM develops rider equipment: we’ve no need to buy in “external experts”. Our facilities are literally teeming with former and current pro riders who we can ask. The responsible production manager is a former Grand Prix rider and when we want to test a new enduro jacket, then we hand it over to KTM Adventure Tours for a few weeks. Afterwards, we know precisely what works in practice and what’s not.

DON’T FORGET THE OIL CHANGE!

A T-shirt is like a motorbike: you can enjoy it for longer if you stick to the maintenance instructions. Although there’s no need for an oil change with an enduro jacket, there are still a few things that ought to be observed. Otherwise, nylon can discolour, leather can break or the T-shirt can shrink more than it should. The things that need to be paid particular attention to are specified on the care label and we don’t just list them for fun. If you abide by the instructions, we promise that you’ll enjoy your PowerWear item for a long time.
